

Montour County Emergency Management Agency and the Montour County Planning Commission are currently underway with updating the county's Hazard Mitigation Plan. As a Local Planning Team, a diverse group of individuals have ranked the selected hazards that are included in the plan update. By using the risk factor assessment tool provided by the Federal Emergency Management Agency, the Local Planning Team discussed each of these hazards and assigned a risk factor score. Hazards identified as *high* risk have risk factors greater than 2.5. Risk factors ranging from 2.0-2.4 were deemed *moderate* risk hazards. Hazards with risk factors 1.9 and less are considered *low* risk. The Local Planning Team then sent the results to each municipality in Montour County to obtain local input and knowledge. If there are any comments or questions on the risk factor assessment please contact Corbin Snyder, consultant at MCM Consulting Group, Inc. at csnyder@mcmconsultinggrp.com
